EXPERIENCE

Senior Software Engineer

Aug 2020 - Present

Epam Systems

- Developed highly reusable components for enterprise Design System, enhancing UI consistency and performance across the platform
- Built client-facing applications focusing on seamless user experience and performance optimization
- Wrote and maintained comprehensive Cypress tests ensuring stability and reliability of features and components
- Served as a mentor and contributor in the company’s Accessibility Mentoring Program, teaching inclusive design practices
- Held mock technical interviews to help trainees prepare for junior developer roles, and took part in interviewing colleagues for internal promotions

Senior Software Engineer

Jun 2019 - Jun 2020

Usetech

- Contributed to design, development, and testing of user-facing web applications for major banking client's main website
- Implemented advanced CSS solutions and SEO improvements while maintaining design consistency
- Increased code coverage to 80% through comprehensive testing strategies and cross-team code reviews
- Collaborated across multiple product teams to improve overall platform usability and performance

Software Developer

Apr 2018 - May 2019

Epam Systems

- Optimized SVG images, fonts, and overall application performance
- Created JavaScript analytics scripts for marketing optimization, analyzing conversion factors and user behavior
- Translated UI/UX design prototypes into production-ready code while refactoring legacy systems

PROJECTS

Language Power Vocabulary App

2024

React, Apollo, GraphQL, Cypress Jest, Figma, Storybook

Modern full-stack vocabulary learning platform built as a TypeScript monorepo. Developed comprehensive language learning solution with interactive games, audio pronunciation, and personalized vocabulary building features.

Live Demo GitHub

Stars Travel - Star Wars Flight Booking Platform

2025

Next.js 15, TypeScript, PostgreSQL, Redis, OpenAI API, Vitest, Playwright

Cross-platform mobile application with offline sync capabilities. Implemented real-time collaboration features and push notifications.

Live Demo GitHub

Digital Detective Portfolio

2025

Next.js 15, TypeScript, Tailwind CSS, Custom Animations

Interactive noir-themed portfolio website featuring immersive detective/mystery design elements. Developed modern portfolio platform with advanced CSS animations and creative visual effects.

Demo GitHub
